

Mission Statement

The mission of the School of Radiologic Technology is to provide for the education of radiologic technologists in a manner which reflects the mission and goals of the Department of Radiology, Harbor-UCLA Medical Center, the Los Angeles County Department of Health Services, the American Society of Radiologic Technologists and the standards of the Joint Review Committee on Education in Radiologic Technology. The twenty-four month program curriculum includes the areas of routine diagnostic radiography, fluoroscopy, computed tomography, and orthopedic, pediatric, portable, and surgical radiography. The program curriculum also includes introductory clinical education in nuclear medicine, mammography, interventional radiology, ultrasound, magnetic resonance imaging and cardiovascular Catheterization lab.
